Clear Capture of Dynamic License Plates

Capturing high-accurate license plates of fast moving vehicles is always of the top concern in traffic monitoring. Equipped with 1/2.8" Starlight Sensor, 60fps frame rate, high-quality deblur and the superior image processing algorithms, the AI LPR cameras achieve excellent capture performance at high speed and accuracy.

Superior Image Quality for 24/7 Traffic Monitoring

With supplement light of IR LED Light or White LED Light integrated, the AI LPR cameras deliver superior image performance and higher accuracy recognition results especially in low-light conditions. And the supplement light could turn on/off automatically, achieving a flexible way for the monitoring control.

AI-powered LPR Algorithm

Based on AI algorithm, the LPR function provides value-added data via a pre-trained deep learning model, which can not only recognize vehicle plates in real time with high accuracy, but also identify more vehicle features, like vehicle type, color, etc., generating powerful security and traffic insights.

Wiegand Protocol Supported

The Supplement Light AI LPR Camera can work with any access control system perfectly with built-in Wiegand interface, greatly expanding its usability to a wider range of application scenes.
